Erosion and Sediment Control Plan - Self Inspection and Maintenance Form

Owner/contractor shall perform inspections every seven days, before and after storm events, and once each 24-hour period during extended storm events or heavy snow melt to identify BMP effectiveness and implement repairs or design changes as soon as feasible depending upon field conditions. The results of all inspections and corrective actions shall be documented and copies of the completed inspection/corrective action checklist shall be submitted fortnightly.

Contractors Acknowledgment:

I certify that I have read and understand this form, an inspection and/or corrective action has been performed as indicated herein, and the information contained herein is true, accurate, and complete. I understand any false information provided will result in a WORK STOP ORDER and/or citation being issued.
