

Required Inspections

The following is a list of inspections required on a new building in the order they should

occur. *(If you are not constructing a building, but only remodeling, start at the beginning of the list and call for the first inspection that applies to you, and continue from there, calling only on the steps that apply to your project.) To schedule an inspection, or to ask an inspection question, please call (801) 629-8950.*
